PROFESSIONAL SUMMARY

Third-year **Electronics & Communication Engineering** student with **CCNA Routing & Switching (98% score · 120 hrs)**, **88+ hours of formal Python training (ITI certified)**, **80 hrs ACPC Newcomers G2 training**, and **Artificial Intelligence (100% score · 80 hrs)**. Hands-on background in **IoT systems**, **CI/CD concepts**, **cloud-connected pipelines**, **MATLAB/Simulink automotive simulations**, and **AI-driven security concepts**. Seeking the **e& Egypt Senior Student Program 2026** in the **IT (DevOps)** and **Enterprise Security (SOC)** tracks. Detail-oriented, fast learner, proven in remote operations and data system management.

Enterprise Security · e& Egypt

EDUCATION

B.Sc. Computer & Control Engineering

Higher Institute for Engineering & Technology at Manzala, Port Said

Major: Computers & Control Engineering · Student Code: 222278

Jan 2023 – 2028 (Expected)

GPA: Excellent

3rd Year

- Core Subjects:** Computer Systems · Control Engineering · C++ Programming · IoT Systems · Electrical Machines · Signal Processing · Electronics · Logic Design
- Key Activity:** ACPC Engineering Team Secretary — managing 20+ members, coordinating training cycles and inter-university competitions

ATS KEYWORDS

DEVOPS / NETWORKING

CCNA CI/CD Python Bash Git
Docker Linux Cloud Automation
SQL Monitoring Pipeline

SECURITY / AI

SIEM SOC AI Incident Response
MITRE ATT&CK Prompt Engineering
Threat Detection Compliance

TOOLS & PLATFORMS

MATLAB Simulink DataCamp
ITI Python ACPC Training Huawei ICT
Cisco CS50x

TECHNICAL SKILLS

NETWORKING (CCNA CERTIFIED)

Routing & Switching TCP/IP Protocols
Network Design Cisco Technologies
VLANs · NAT

PROGRAMMING & SCRIPTING

Machine Learning Concepts

WORK EXPERIENCE

Data Entry Clerk & Digital Systems Operator

6 Months

Smart Medical Company · Port Said, Egypt

- Digitized and structured large-scale medical and financial records — demonstrating **end-to-end data pipeline management** core to DevOps culture.
- Maintained **99%+ accuracy** in large datasets using MS Excel with data validation and automated error-reduction workflows.
- Enforced strict **data confidentiality and compliance policies** — mirrors SOC **access control and information security governance**.
- Coordinated asynchronously with remote teams, demonstrating professional cross-functional digital communication.

Team Secretary & Operations Coordinator — ACPC Engineering Team

Higher Institute of Engineering & Technology – NDETI · Competitive Programming

2024 – Present

- Managed automated tracking databases for **20+ team members** using Excel & Google Sheets — analogous to **system health monitoring and dashboards** in DevOps.
- Coordinated multi-site training operations, ACPC preparation schedules, and inter-university logistics both remotely and on-site.
- Maintained comprehensive technical documentation, incident tracking, and progress reports.

TECHNICAL PROJECTS

IoT-Based Energy Monitoring System

DevOps Pipeline Cloud Integration Real-Time Monitoring Embedded C++

- Full-stack IoT data pipeline: ESP32 → local processing → cloud dashboard — complete system ownership mirroring **CI/CD DevOps methodology**.
- Implemented real-time monitoring via cloud dashboard — directly translatable to DevOps observability (Prometheus/Grafana concepts).

AI-Based Fire Detection System — Startup Concept

SOC AI Threat Detection Incident Response Entrepreneurship Program

- AI-driven threat detection with real-time alerts and response workflows — maps directly to **SOC SIEM alerting**.
- Pitched to industry stakeholders at Royal Company Entrepreneurship Program — technical communication and business presentation skills.

CodeLens — Automated Code Language & Tag Detection

Python Machine Learning Syntax Analysis GitHub API

- Engineered an intelligent developer tool that instantly detects programming languages and generates context-aware tags from raw code snippets

ALL CERTIFICATIONS (16+)

● CCNA — Routing and Switching

Jan 24 – Feb 18, 2026 · Student ID: 192979

98% Score ★ 120 Hrs
Networking · DevOps

● Artificial Intelligence (AI)

Sep 12 – 27, 2025

100% Score ★ 80 Hrs AI · SOC Detection

● ACPC Newcomers G2 Training

NDETI + ACPC Community · Oct 24, 2025 – Feb 7, 2026

80 Hrs Algorithms · C++

● Professional Python Programming

ITI + IEEE PSU-SB

40 Hrs Scripting · DevOps

● Intermediate Python Programming

ITI + Elite Talents Academy

24 Hrs Python · Automation

using ML models.

- Analyzed structural patterns and syntax keywords, eliminating manual tagging for large codebases and automating query routing.

Smart Blind Stick — Assistive IoT System

Arduino (Embedded C++) Ultrasonic Sensors Audio & Haptic Alerts 3D CAD (Blender)

- Designed an assistive smart cane for visually impaired individuals utilizing multi-directional ultrasonic sensor arrays for real-time obstacle detection.
- Programmed Arduino control logic for instant audio buzzer and haptic alerts, featuring custom 3D enclosure modeling.

Electronic Eye & Light Blocker Safety System

NE555 Timer IR Sensors Transistor Logic Relay Automation

- Developed an optical barrier detection system utilizing infrared pulse signals and NE555 timer oscillation for perimeter safety monitoring.
- Integrated transistor switching and relay logic to automate external alarm responses and device cut-offs upon beam interruption.

MathWorks MATLAB/Simulink — EV & Automotive Systems Simulation

MATLAB · Simulink EV · Motor Control Battery & BMS Vehicle Dynamics

- Completed MathWorks Online Awareness Campaign (Sept 2025) covering EV design, Motor Control, Battery Management Systems, Longitudinal & Lateral Vehicle Dynamics, Suspension, Steering, and 3D Visualization.
- Applied MATLAB and Simulink tools for automotive and electric vehicle simulation — directly linked to **automated systems and control engineering**.

Binary Counter Applications in Engine ECU & Fuel Injection

Control Systems Automation Logic Multi-Format Documentation

- Modeled real-time control logic using binary counters in Engine Control Units — foundational systems automation skills.
- Delivered multi-format technical outputs: interactive HTML widget, Word documentation, and visual Arabic summary.

Metal Indicator & Frequency Oscillator Circuit

555 Timer (VFO) Inductive LC Resonator Signal Processing Audio Output

- Developed a Beat Frequency Oscillator (BFO) metal detection circuit utilizing NE555 timer IC and tuned LC resonant coils.
- Analyzed electromagnetic field disruptions to convert inductance shifts into audible frequency tone variations for metallic object detection.

COMPETITIVE PROGRAMMING — ACPC 2026

- **Formal Training (Certified):** ACPC Newcomers G2 Training — **80 Hours** · Oct 24, 2025 – Feb 7, 2026 · NDETI + ACPC Community

● Introduction to Python Programming

ITI + IEEE PSU-SB

24 Hrs Python Foundations

● Python Programming Basics
